

65 Years of Experience and Fruitful Results

We farmed nearly one billion plants on our lands in the last 65 years. Those plants were then farmed by thousands of growers and gardeners. These are your fruits that bring joy to a lot of people in North America.

Six new varieties:

AAC-Audrey:

Yield and quality

AAC-Dynamik:

Early yield day neutral

AAC-Evelyn:

Size and firmness

AAC-Kate:

Large size in late season

Dickens:

Yield and uniformity

Magnum:

Outstanding flavor

LAREAULT

Technology, control and tracking are at the heart of our fruit plant propagation

Control

✓ Starting on solid grounds

- Double sampling of viruses (SMYEV and SMOV) before digging.
- Isolation of foundation and elite stock blocks.
- Clonal verification and exhaustive viral eradication to begin.
- Thresholds levels under North American limits.
- A control of insects vectors, efficient and without mercy.

Production

✓ Crop Rotation :

4 years of crop rotations and soil disinfection before planting.

✓ GPS Technology :

Better plant growth, better weed insects and foliar diseases control.

Production Lareault online transactional website, a complete success!

lareault.com

Online interactive order form

Designed and built for our clients, it helps and guides you into through your cultural small fruit projects, or enable the awakening of the urban farmer in you. You will find product info, current and older versions of catalogs and the frequently ask questions section. We value your comments.

RESEARCH EFFORTS DELIVER !

HERE IS OUR NEW BOX !

MADE SPECIALLY FOR PRECOOLING OF ALL PLANT TYPES,
MADE SPECIALLY TO IMPROVE PLANT STORAGE LONGEVITY
AND PLANT ESTABLISHMENT.

Conditionning

✓ **Strawberry plants pre-cooling !**

Feasible and worth it :

Better shelf life of fresh dug plants and frigo plants.

Tracking

✓ **From the first step** of propagation all the way to the boxing, through digging and grading, your plants are tracked by a specific code on the box.

BETTER PLANTING TECHNIQUES WITH OUR
STICKING LINE, INCREASED UNIFORMITY.

EARLY
VARIETIES

EARLY, WITH A HIGHER YIELD
COMPARED TO JEWEL OVER A
TWO-YEAR HARVEST.

AAC-EVELYN

Very, very large fruits. Shiny and elongated berries.

Growth and vegetation

Erect growth with deep green foliage
Medium to good runnering. Good tolerance
to foliar diseases.

THREE NOVELTIES : THESE THREE WON'T GO UNNOTICED :
AAC-Audrey perfect on all points, AAC-Evelyn and AAC-Kate
firmness and size will impress you.

AAC-AUDREY

Unequaled fruit qualities. Sweet and flavorful. Firm, shiny and attractive.

Growth and vegetation

Vigorous growth with strong cup shaped
leaves. Good runnering, ease of harvest.

Harvest and Yield

On a two-year trials, yields were superior
when compared to Jewel. Early
harvest.

Berries

Uniform and large fruit size, bright red, firm
but very flavorful. Cull rates very low during
comparative tests.

MID-SEASON'S
HARVESTLATE
VARIETIES**Harvest and yield**

Mid season to late harvest, Yield similar to
Jewel.

Berries

Very, very large fruits size. Shiny, flavorful
and elongated berries.

AAC-KATE

Growth and vegetation

Compact growth with a dark green foliage.
Medium vigor and runnering. Good
resistance to foliar diseases.

Harvest and yields

Late-season harvest with excellent yield
similar to Jewel.

Berries

Very large size and very firm. Bright red and
flavorful.

MOST POPULAR VARIETIES : Among our large cultivar selections, you will build a spread harvest on those
reliable one's. AAC-Lila to start with high quality berries, Jewel will dominate the mid-season.

EARLY
VARIETIES

UNANIMOUSLY CONFIRMED IN PROFESSIONAL
CHOICE, MORE WINTER HARDY THAN JEWEL ...
ALWAYS RELIABLE IN QUALITY

AAC-LILA **EXCLUSIVITY****Growth and vegetation**

Vigorous plant with an open growth,
making picking easy.

Harvest and yield

Predicted yield similar to Jewel.
Increased picking speed.

Berries

Bright red, firm and of large size.
Excellent taste

MID-SEASON'S
HARVEST

JEWEL

Harvest and yields

Highly productive mid-season harvest,
industry reference standard.

Berries

Very attractive bright shiny red fruits. Very
good size and firmness.

HEIRLOOM CULTIVARS : Hardiness and flavors of yesterdays! Veestar for harvest opening, a hint of wild berries. Kent for a plentiful mid-season and Bounty for a sweet finish! Happy harvesting!

VEESTAR

Growth and vegetation

Spread and dense foliage with small dark green leaves. Very hardy.

Harvest and yields

Very early harvest can be forced with a row cover, excellent for U-Pick.

Berries

Shiny red fruit of medium size, sweet and firm.

KENT

Growth and vegetation

Dense and spread growth with a dark green foliage. Excellent vigor and running.

Harvest and yields

A standard in its day's for a mid-season. Very productive and hardy.

Berries

Bright red and firm, very good size. Good flavor.

BOUNTY

Growth and vegetation

Dark green foliage with and upright growth. Vigorous and good running. Susceptible to common leaf spot.

Harvest and yields

Late-season harvest with good yield for U-pick.

Berries

Good size fruits of dark red color and of excellent flavor. Medium firmness.

MOST POPULAR VARIETIES : AC-ST Laurent will maintain berry quality until Malwina bears high quality berries. 5 weeks of non-stop top quality fruits.

MALWINA

Growth and vegetation

Vigorous growth with erect foliage, medium running and a sensitivity to powdery mildew.

Harvest and yield

Very late harvest , good yield that will end

AC-ST-LAURENT

Growth and vegetation

Vigorous growth with a low spreading habit and good running. Foliage is medium green with excellent resistance to common foliar diseases.

Harvest and yield

Excellent yield, a long harvest starting a week after Jewel.

Berries

Bright red, firm of large size.

A TASTY VARIETY WITH EXCELLENT FRUIT QUALITY, THAT WILL STRETCH THE SALE SEASON FOR THE U-PICK AND THE FARM STAND.

one week after Summer Evening.

Berries

Deep red, firm and tasty. Large berries that ripen underneath the canopy.

NEW VARIETY

MID-SEASON
VARIETIES

DICKENS

Growth and vegetation

Medium green foliage with an upright growth. Good vigor and running. Resistance to foliar diseases.

Harvest and yields

Mid-season to late harvest. Follows Jewel in the production dates with a similar yield.

Berries

A short conical fruit with good size. Flavorful, bright red and very firm berries.

MID-SEASON
VARIETIES

LAUREL

AN IMPROVED CAVENDISH

- Better firmness
- Better uniformity
- Better disease resistance

Photo credit : Agriculture and Agri-Food Canada

LAUREL

Growth and Vegetation

Vigorous growth and good running. Tolerance to leaf diseases.

Harvest and yield

Mid season's harvest, with good yield, an improved Cavendish.

Berries

Good size, firmer and more uniform than Cavendish. Deep red berries of very good quality.

NEW VARIETY

MID-SEASON
VARIETIES

AAC-GÉNÉREUSE

Growth and vegetation

Hardy and disease resistant foliage. Vigorous growth and running.

Harvest and yield

High yield.

Berries

Conical to globe shape fruit of medium size. Blood red type with a light shine similar to Kent.

EARLY
VARIETIES

MAGNUM

Growth and vegetation

Dark green foliage with upright growth, medium vigor and running. Good resistance to foliar diseases.

Harvest and yields

Early harvest spreading into the mid-season. Good yield.

Berries

Firm and large bright red fruit with very good size but also very sweet.

CHARLOTTE

A NORTH AMERICAN EXCLUSIVITY FROM PRODUCTION LAREAULT

Charlotte's flavor is exceptionnally outstanding, known as a European trademark for years now, Charlotte has a unanimous aromatic and perfumed taste. Charlotte is a premium commercial strawberry. Charlotte is a Top of the line commercial strawberry chosen by renown Chefs.

Growth and vegetation

Large and vegetative foliage with medium runnering. Good tolerance to powdery mildew and spider mites. Highly adapted to Canadian winters.

Harvest and yield

Yield comparable to Albion in the first year but superior on a second year. Second flush from mini-tray is early and abundant. Will perform better under low fertilization regimes.

Berries

Average fruit size from 17 to 20 gr. Blood red typical fruit color. Unique wild strawberry aroma developed by a low acidity content.

ALBION

Growth and vegetation

Strong and upright growth habit with a good runner emission in June. Spider mites susceptible, but good tolerance to powdery mildew. Will benefit from a good winter protection for a second year crop.

Harvest and yield

Fruit set slower than Seascape but better heat tolerance. Ideal for southern Québec

and Ontario. Excellent companion with Seascape for size stability in a Mini-tray production.

Berries

Bright shiny red color that darkens upon ripening. Will sustain rain damage with very good firmness. Excellent taste when picked ripe.

AAC-DYNAMIK **NEW VARIETY**

25% higher yield than Seascape.
Fruit quality comparable to Albion.

Growth and Vegetation

Compact growth and low runnering. Low susceptibility to foliar diseases and glossy foliage.

Harvest and yield

As early as Seascape with 25 to 30% more yield.

Berries

Conical fruits, shiny red, firm and juicy tough skin.

SEASCAPE

Growth and vegetation

Vegetative growth of medium vigor. Will benefit from a good winter protection for a second year crop. Powdery mildew and spider mite susceptibility.

Harvest and yield

Day neutral reference for harvest curve in Eastern Canada. Bear an early crop of large size berries. Size will drop rapidly.

Possible gap between second flush in mid-July.

Berries

Berries are firm and glossy with a balance taste between acid and sugar. Render an excellent taste late in the summer when nights are cooling down. Good shelf life with a tendency to darken. Will be damaged by rain.

Day-neutral **STRAWBERRY** pink flowers

PICKING**

**VERY
GOOD
SHELF LIFE**

**FREE
OF
SPINES**

NOVA

Growth and vegetation

Vigorous stand with high suckering. Canes are very tall with a few spines, avoid heavy soils.

Harvest and yield

Very good productivity and hardiness. Harvest begins in

mid-season, with a good tolerance to late leaf rust.

Berries

Large size and good flavor berries. Medium red color with good firmness. Will bear fruits occasionally in exceptionally warm falls.

Fall fruiting red **RASPBERRIES**

PATHFINDER

Growth and vegetation

Vigorous and stocky, stand with profuse cane production. Short and spiny canes.

Harvest and yield

Will be the first variety to bear fruits most often in August. Excellent yields with a spider

mites susceptibility. Mandatory to protect against late leaf rusts (Orange rust) starting in June.

Berries

Nice pale red and good size berry. Excellent choice for U-pick operations and retail markets.

POLANA

Growth and vegetation

Good and vigorous stand. Canes of medium height.

Harvest and yield

Harvest will start right after Pathfinder. Excellent choice for high-tunnel or any protected type of cultivation.

Berries

Large size and firm, with a bright shiny red color. Will occasionally bear some double fruits.

Yellow **RASPBERRY**

ANNE

Growth and vegetation

Upright and vigorous canes, light green foliage on a spiny cane.

Harvest and yields

Harvest will start after Polana, Good yield.

Berries

Unique flavor and very good size and firmness. Attractive berries will turn golden when fully ripen.

Highbush **BLUEBERRIES**

VERY LARGE FRUIT SIZE, EARLY AND VERY PRODUCTIVE, EXCELLENT DISEASE RESISTANCE.

LATE HARVEST WITH LARGE FRUIT SIZE. HIGH YIELD ON YOUNG PLANTS. ADAPTED TO MECHANICAL HARVEST. VERY GOOD FRUIT QUALITY.

FOUR
NEW
VARIETIES
TO TRIAL

VERY PRODUCTIVE, MID-SEASON AND LARGE SIZE BERRY. ADAPTED TO MECHANICAL HARVEST.

SWEET AND FIRM. EARLY AND VERY PRODUCTIVE. EXCELLENT DISEASE RESISTANCE.

CHANTICLEER

Growth and vegetation

Vigorous bush of 1,5M. Upright growth with flowers bearing outside the canopy.

Harvest and yield

Very good yield, late flowering but early harvest.

Berries

Very large fruit size adapted to all harvest methods. Very good disease resistance.

DRAPER

Growth and vegetation

Vigorous upright bush of 1.5 m high. High number of branches.

Harvest and yield

Late harvest with a high yield in the early growth years. Very good yield.

Berries

Excellent fruit quality. Large size and easy to reach berries. Adapted to mechanical harvest.

HURON

Growth and vegetation

Upright and vigorous bush of 1,4M. Very good hardiness.

Harvest and yield

Easy to reach mid-season crop. Adapted to mechanical harvest.

Berries

Very large fruit size. Excellent shelf life, color medium blue.

SWEETHEART

Growth and vegetation

Vigorous bush of 1,5M. Hybridized with low bush blueberry parentage.

Harvest and yield

Self pollinating like Patriot. Early and very productive.

Berries

Firm and very sweet. Suits all type of harvesting. Easy to reach fruits.

SUPERIOR

is a new variety of highbush blueberry issued like Patriot, from a cross with lowbush blueberries. Bearing medium size fruits, on a 1,5 M bush with an erect growth, Superior is a very hardy mid season variety showing good tolerance to diseases. Superior is a fine addition to your blueberry patch for U-pick or transformation in northern climate. To be discovered.

PATRIOT

Growth and vegetation

Vigorous bush with a spread growth of 1,5 meters tall. The open bush will facilitate trimming and harvesting. Very hardy and well adapted to heavy soil.

Harvest and yield

Late mid-season harvest. Long harvest period well suited for u-pick operations.

Berries

Bears a good flavor, firm and medium blue berry. Size of the berry starts very large and gradually declines with harvesting. Good flavor, needs a long ripening period on the bush before harvest (8 to 12 days).

POLARIS

Growth and vegetation

Upright bush of 1,5m height. Very cold hardy can be planted tighter to increased yield per acre. Low disease incidence.

Harvest and yield

Early crop with fast ripening. Good productivity year after year despite cold winters. Fruit initiation is early in the fall.

Berries

Good size fruit, pale blue with excellent taste and aroma. Taste will develop very rapidly on the bush after full coloration.

US**

TO FIND OUT ABOUT
AVAILABLE VARIETIES

BLUEBERRIES Lowbush
BRUNSWICK • BLOMIDON

HARDY-BLACK

Growth and vegetation

Vigorous plant with low suckering. Will shoot out, long bending thorny canes. Excellent hardiness.

Harvest and yield

Early and abundant. Must be winter protected in colder region.

Berries

Larger size than wild blackberries. Excellent taste.

Hardy Black like the name says, this is a Hardy blackberry that bears fruit early on thorny long canes. Similar to its wild counterpart, berries are larger and better suited to free picking. It will perform better in our winters but may need winter protection in Zone 4 and colder.

CARMINE JEWEL

Growth and vegetation

Very vigorous with a low sucker production. Orchard easy to maintain and establish.

Harvest and yield

Early harvest with good productivity. Will bear fruits very quickly after establishment.

Berries

Small pit and lots of flesh. Fruit and flesh are both dark red. Average fruit weight of 3,5 gr. Will accommodate evenly fresh market and transformation.

 **lareault.com**
Online interactive order form

DWARF CHERRIES introduced by the University of Saskatchewan are small trees with maximum height of 2,5 m and yields that can reach from 10 to 15 Kg of fruit per tree. These plants are extremely hardy and can withstand temperature as low as -40oC. (Zone 2b). Fruits are of superior quality than those of traditional hardy cherry trees (Prunus cerasus) such as the Evans and Montmorency varieties. Fruits are also bigger and sweeter. Picking season starts in July, lifespan of the stand can be of 20-25 years. Plants are self-pollinating (Bees preferred). Plants must be protected from dominant winds. A pH of 6,5 and more is ideal in a light soil, but other condition are tolerated. Pruning can be done in the spring after the 5th year of growth. Never prune more than 20% of the bush canopy volume. Deers, squirrels, birds and caterpillars are among their natural enemies.

AURORA

Growth and vegetation

Vigorous bush of 1,3 à 1,7 M. Upright and spreaded. Good resistance to mildew.

Harvest and yield

Excellent yield. Will pollinate other varieties of University of Saskatchewan. Ease of picking.

Berries

Shape is like a stretched pear. Size average is 1,9 gr. Ideal for gardens and free picking.

BOREAL BEAUTY

Growth and vegetation

Upright growth and very vigorous bush, sturdier stems than other known varieties. Excellent resistance to mildew.

Harvest and yield

The latest variety with excellent productivity, very good for mechanical harvesting.

Berries

Excellent berry size, larger to the Indigo series and Tundra. Firm and thick fruit with oval shape. Berries will remain attached to the stems and ease mechanical harvest.

BOREAL BEAST

Growth and vegetation

Vigorous bush with an upright growth, stems are sturdier than other know varieties with an increase mildew tolerance.

Harvest and yield

Late variety with very good productivity suited for mechanical harvesting.

Berries

Increase fruit size when compared to Tundra and the Indigo series. Off the scale flavour and aroma. Berries stay attached to the stems for a prolong period and ease the mechanical harvesting.

BOREAL BLIZZARD

Growth and vegetation

Very vigorous upright bush. Increase growth rate compared to the indigo series.

Harvest and yield

Mid-season to late harvest, a week later than Tundra. Excellent yield.

Berries

Fruit weight from 3 to 4 gr. Good firmness and excellent flavor.

LARGE FRUIT SIZE
EXCELLENT FLAVOR
VERY PRODUCTIVE
VERY LATE SEASON

Why choose crowns

SHORTER GROWTH PERIOD BEFORE HARVEST.

MINIMIZE STRESS AT PLANTING.

IMPROVED VIGOR GETTING
OUT OF DORMANCY.

ROOTS AND CROWNS LOADED
WITH CARBOHYDRATES .

NEW ASPARAGUS

ECLIPSE

Growth and vegetation

Excellent hardiness and vigour selected for its foliar disease resistance and longevity of years of harvests.

Harvest and yield

Have showed equal or higher marketable yield than Guelph Millenium as well as an increase longevity of years of harvests.

Spears

Long, smooth spears with tight tips and uniform spear diameter. Like Millenium, spears stay tight long after emergence.

Roots are sowed with a
precision seeder in a
sterilized soil.

MILLENIUM

Growth and vegetation

Very good hardiness and productivity. Will exhibit rust susceptibility under favorable conditions.

Harvest and yield

Excellent yield sustained year after year.

Spears

One of the best rated spears on the market. Spears will stay tight long after emerging. Even under hot conditions spears quality do not decline.
