

OUR WIDE
VARIETAL SELECTION

Bulletin **Les P'tits Fruits**
volume 32, 2023

Our plants: The fruit of quality

LAREAULT
lareault.com

Technology, control and tracking are at the heart of our fruit plant propagation

1

Control

STARTING ON SOLID GROUNDS

- Double sampling of viruses (SMYEV and SMOV) before digging.
- Isolation of foundation and elite stock blocks.
- Clonal verification and exhaustive viral eradication to begin.
- Thresholds levels under North American limits.
- A control of insects vectors, efficient and without mercy.

2

Production

CROP ROTATION:

4 years of crop rotations and soil disinfection before planting.

GPS TECHNOLOGY:

Better plant growth, better weed, insect and foliar diseases control.

WHY PLANT

MINI TRAYS IN AUGUST?

High-end product, the mini tray can be used for very early harvest, increased fruit size and outstanding fruit quality.

VARIETIES THAT DON'T GO UNNOTICED. AAC-Audrey: Who stands out in every way. AAC-Lila: A quality start to the season. Magnum: Flavor and earliness.

PROTECTED VARIETY AAC-AUDREY

Unequalled fruit qualities. Sweet and flavorful. Firm, shiny and attractive.

**EARLY, WITH A HIGHER YIELD
COMPARED TO JEWEL OVER A
TWO-YEAR HARVEST.**

Growth and vegetation

Vigorous growth with strong cup shaped leaves. Good runnerring, ease of harvest.

Harvest and yield

On a two-year trials, yields were superior when compared to Jewel. Early harvest.

Berries

Uniform and large fruit size, bright red, firm but very flavorful. Cull rates very low during comparative tests.

**UNANIMOUSLY CONFIRMED
IN PROFESSIONAL CHOICE, MORE
WINTER HARDY THAN JEWEL ...
ALWAYS RELIABLE IN QUALITY.**

PROTECTED VARIETY AAC-LILA

Growth and vegetation

Vigorous plant with an open growth, making picking easy.

Harvest and yield

Predicted yield similar to Jewel. Increased picking speed.

Berries

Bright red, firm and of large size. Excellent taste.

PROTECTED VARIETY MAGNUM

Growth and vegetation

Dark green foliage with upright growth, medium vigor and runnerring. Good resistance to foliar diseases.

Harvest and yield

Early harvest spreading into the mid-season. Good yield.

Berries

Firm and large bright red fruit with very good size but also very sweet.

SAFE BETS IN MID-SEASON: Jewel, A Mid-Season Champion. AAC-Evelyn: Size and firmness.

AAC-Genereuse: High yield and created here.

JEWEL

Growth and vegetation

Upright growth with large leaves, vigorous growth and runnerring. Susceptible to powdery mildew

Harvest and yield

Highly productive mid-season harvest, industry reference standard.

Berries

Very attractive bright shiny red fruits. Very good size and firmness.

PROTECTED VARIETY AAC-EVELYN

**Very, very large fruits.
Shiny and elongated berries.**

Growth and vegetation

Erect growth with deep green foliage. Good runnerring. Good tolerance to foliar diseases.

Harvest and yield

Mid season to late harvest. Yield similar to Jewel.

Berries

Very, very large fruits size. Shiny, flavorful and elongated berries.

PROTECTED VARIETY AAC-GÉNÉREUSE

Growth and vegetation

Hardy and disease resistant foliage. Vigorous growth and runnerring.

Harvest and yield

High yield.

Berries

Conical to globe shape fruit of medium size. Blood red type with a light shine similar to Kent.

EXCELLENT CHOICE OF QUALITY FOR LATE SEASON: AC-St Laurent, a hardy late season of high quality, suitable for retail and wholesale. AAC-Kate : Size and firmness on the tail end of the season. Malwina: Ending the junebearing season in August , a mixture of flavor and size.

A TASTY VARIETY WITH EXCELLENT FRUIT QUALITY, THAT WILL STRETCH THE SALE SEASON FOR THE U-PICK AND THE FARM STAND.

PROTECTED VARIETY

AC-ST-LAURENT

Growth and vegetation

Vigorous growth with a low spreading habit and good runnery. Foliage is medium green with excellent resistance to common foliar diseases.

Harvest and yield

Excellent yield, a long harvest starting a week after Jewel.

Berries

Bright red, firm of large size.

PROTECTED VARIETY

AAC-KATE

Growth and vegetation

Erect growth with deep green foliage Good runnery. Good tolerance to foliar diseases.

Harvest and yield

Mid season to late harvest, Yield similar to Jewel.

Berries

Very, very large fruits size. Shiny, flavorful and elongated berries.

PROTECTED VARIETY

MALWINA

Growth and vegetation

Vigorous growth with erect foliage, medium runnery and a sensitivity to powdery mildew.

Harvest and yield

Very late harvest , good yield that will end one week after Summer Evening.

Berries

Deep red, firm and tasty.
Large berries that ripen underneath the canopy.

STRAWBERRIES Day-neutral

PROTECTED VARIETY

ALBION

Growth and vegetation

Strong and upright growth habit with a good runner emission in June. Spider mites susceptible, but good tolerance to powdery mildew. Will benefit from a good winter protection for a second year crop.

Harvest and yield

Fruit set slower than Seascape but better heat tolerance. Ideal for southern Québec

and Ontario. Excellent companion with Seascape for size stability in a Mini-tray production.

Berries

Bright shiny red color that darkens upon ripening. Will sustain rain damage with very good firmness. Excellent taste when picked ripe.

PROTECTED VARIETY

FLORIDA – BEAUTY

Heat wave resistant!

Growth and vegetation

Compact growth with open foliage and good runnerring. Resistant to warm weather and heavy feeder.

Harvest and yield

Earliness and yield similar to Seascape. Will go on with fruit set even in warm weather. Nonstop flowering.

Berries

Large, round to conical fruit, shiny, firm and pleasant taste. Excellent shelf life.

PROTECTED VARIETY

MURANO

Flavor, firmness and productivity

Growth and vegetation

Dense and dark foliage with upright growth. Good runnerring with good diseases resistance.

Harvest and yield

Early harvest, similar to Seascape. Will exhibit continuous and profuse flowering with excellent yield.

Berries

Flavorful and very firm fruit. Conical shape with bright red color and tough skin.

NEW VARIETY

PROTECTED VARIETY

SHANNON M. KENT

Size, ease of harvest and yield

Growth and vegetation

Dark green foliage with good runnerring and compact growth. The open canopy leaves access and facilitate fruit picking.

Harvest and yield

Early harvest with superior yield compared to Seascape and Albion.

Berries

Very large fruit, of round shape and very firm. Very good taste and improved shelf life.

PROTECTED
VARIETY

CHARLOTTE

A NORTH AMERICAN EXCLUSIVITY FROM PRODUCTION LAREAULT.

Charlotte's flavor is exceptionally outstanding, known as a European trademark for years now, Charlotte has a unanimous aromatic and perfumed taste. Charlotte is a premium commercial strawberry. Charlotte is a Top of the line commercial strawberry chosen by renown Chefs.

Growth and vegetation

Large and vegetative foliage with medium runnering. Good tolerance to powdery mildew and spider mites. Highly adapted to Canadian winters.

Harvest and yield

Yield comparable to Albion in the first year but superior on a second year. Second

flush from mini-tray is early and abundant. Will perform better under low fertilization regimes.

Berries

Average fruit size from 17 to 20 gr. Blood red typical fruit color. Unique wild strawberry aroma developed by

a low acidity content.

PROTECTED
VARIETY

AAC-DYNAMIK

**25% higher yield than Seaside.
Fruit quality comparable to Albion.**

Growth and vegetation

Compact growth and low runnering. Low susceptibility to foliar diseases and glossy foliage.

Harvest and yield

As early as Seaside with 25 to 30% more yield.

Berries

Conical fruits, shiny red, firm and juicy tough skin.

SEASCAPE

Growth and vegetation

Vegetative growth of medium vigor. Will benefit from a good winter protection for a second year crop. Powdery mildew and spider mite susceptibility.

Harvest and yield

Day neutral reference for harvest curve in Eastern Canada. Bear an early crop of large size berries. Size will drop rapidly. Possible gap between second flush in mid-July.

Berries

Berries are firm and glossy with a balance taste between acid and sugar. Render an excellent taste late in the summer when nights are cooling down. Good shelf life with a tendency to darken. Will be damaged by rain.

Summer fruiting red RASPBERRIES

PROTECTED VARIETY

PRÉLUDE An early cropper that stand out!

Growth and vegetation

Long vigorous and resistant canes, good hardiness.

Harvest and yield

Excellent productivity, early harvest with some fall bearing fruits, if

conditions are favorable, a production bonus!

Berries

Good size firm fruit with tight drupeoles. Flavorful and firm berries.

NOVA

Growth and vegetation

Vigorous stand with high suckering. Canes are very tall with a few spines, avoid heavy soils.

Harvest and yield

Very good productivity and hardiness. Harvest begins in mid-season, with a good tolerance to late leaf rust.

Berries

Large size and good flavor berries. Medium red color with good firmness. Will bear fruits occasionally in exceptionally warm falls.

PROTECTED VARIETY

AAC-EDEN

Growth and vegetation

Vigorous plant. Canes free of spines. Excellent hardiness.

Harvest and yield

Predicted yield higher than Nova. Harvest dates similar or before Nova.

FAST PICKING

VERY GOOD SHELF LIFE

FREE OFF SPINES

Berries

Large size, firm and easy to pick. Light red color, silky, not shiny. Excellent taste.

Fall fruiting red RASPBERRIES

PROTECTED VARIETY

POLANA

Growth and vegetation

Good and vigorous stand. Canes of medium height.

Harvest and yield

Harvest will start right after Pathfinder. Excellent choice

for high-tunnel or any protected type of cultivation.

Berries

Large size and firm, with a bright shiny red color. Will occasionally bear some double fruits.

PATHFINDER

Growth and vegetation

Vigorous and stocky, stand with profuse cane production. Short and spiny canes.

Harvest and yield

Will be the first variety to bear fruits most often in August with excellent

yield. Spider mite susceptibility. Mandatory to protect against late leaf rust (Orange rust) starting in June.

Berries

Nice pale red and good size berry. Excellent choice for U-pick operations and retail markets.

Yellow RASPBERRIES

PROTECTED VARIETY

ANNE

Growth and vegetation

Upright and vigorous canes, light green foliage on a spiny cane.

Harvest and yield

Harvest will start after Polana, Good yield.

Berries

Unique flavor and very good size and firmness. Attractive berries will turn golden when fully ripen.

Highbush BLUEBERRIES

CHANTICLEER

VERY LARGE FRUIT SIZE, EARLY AND VERY PRODUCTIVE, EXCELLENT DISEASE RESISTANCE.

Growth and vegetation

Vigorous bush of 1.5M. Upright growth with flowers bearing outside the canopy.

Harvest and yield

Very good yield, late flowering but early harvest.

Berries

Very large fruit size adapted to all harvest methods. Very good disease resistance.

DRAPER

LATE HARVEST WITH LARGE FRUIT SIZE. HIGH YIELD ON YOUNG PLANTS. ADAPTED TO MECHANICAL HARVEST. VERY GOOD FRUIT QUALITY.

Growth and vegetation

Vigorous upright bush of 1.5 m high. High number of branches.

Harvest and yield

Late harvest with a high yield in the early growth years. Very good yield.

Berries

Excellent fruit quality. Large size and easy to reach berries. Adapted to mechanical harvest.

HURON

VERY PRODUCTIVE, MID-SEASON AND LARGE SIZE BERRY. ADAPTED TO MECHANICAL HARVEST.

Growth and vegetation

Upright and vigorous bush of 1.4M. Very good hardiness.

Harvest and yield

Easy to reach mid-season crop. Adapted to mechanical harvest.

Berries

Very large fruit size. Excellent shelf life, color medium blue.

SWEETHEART

SWEET AND FIRM. EARLY AND VERY PRODUCTIVE. EXCELLENT DISEASE RESISTANCE.

Growth and vegetation

Vigorous bush of 1.5M. Hybridized with low bush blueberry parentage.

Harvest and yield

Self pollinating like Patriot. Early and very productive.

Berries

Firm and very sweet. Suits all type of harvesting. Easy to reach fruits.

BLUEBERRIES LOWBUSH
BRUNSWICK • BLOMIDON

VISIT THE WEBSITE

TO FIND OUT
ABOUT AVAILABLE
VARIETIES

lareault.com

PATRIOT

Growth and vegetation

Vigorous bush with a spread growth of 1.5 meters tall. The open bush will facilitate trimming and harvesting. Very hardy and well adapted to heavy soil.

Harvest and yield

Late mid-season harvest. Long harvest period well suited for upick operations.

Berries

Bears a good flavor, firm and medium blue berry. Size of the berry starts very large and gradually declines with harvesting. Good flavor, needs a long ripening period on the bush before harvest (8 to 12 days).

SUPERIOR

is a new variety of highbush blueberry issued like Patriot, from a cross with lowbush blueberries. Bearing medium size fruits, on a 1.5M bush with an erect growth, Superior is a very hardy mid season variety showing good tolerance to diseases. Superior is a fine addition to your blueberry patch for U-pick or transformation in northern climate. To be discovered.

POLARIS

Growth and vegetation

Upright bush of 1.5m height. Very cold hardy can be planted tighter to increased yield per acre. Low disease incidence.

Harvest and yield

Early crop with fast ripening. Good productivity year after year despite cold winters. Fruit initiation is early in the fall.

Berries

Good size fruit, pale blue with excellent taste and aroma. Taste will develop very rapidly on the bush after full coloration.

HARDY BLACK
A SURPRISING
BLACKBERRY

HARDY-BLACK

Growth and vegetation

Vigorous plant with low suckering. Will shoot out, long bending thorny canes. Excellent hardiness.

Harvest and yield

Early and abundant yield.

Must be winter protected in colder region.

Berries

Larger size than wild blackberries. Excellent taste.

Available **BLACKBERRY** VARIETY LINES

Period	Variety	Origin	Hardiness	Productivity	Size	Flavor	Firmness	Appreciation	Whole-sav.	Retail	Pick-your-one	Process.	Type of Plants
	Hardy Black	ON	Hardiness					
	Perron noir	QC	Thornless					

Excellent Très bien Bien ... Moyen .. Passable .. ** Variété protégée (Certificat d'obtention végétale délivré)

Hardy Black like the name says, this is a Hardy blackberry that bears fruit early on thorny long canes. Similar to its wild counterparts, berries are larger and better suited to free picking. It will perform better in our winters but may need winter protection in Zone 4 and colder.

CHERRIES

PROTECTED VARIETY

CARMINE JEWEL

Growth and vegetation

Very vigorous with a low sucker production. Orchard easy to maintain and establish.

Harvest and yield

Early harvest with good productivity. Will bear fruits very quickly after establishment.

Berries

Small pit and lots of flesh. Fruit and flesh are both dark red. Average fruit weight of 3.5 gr. Will accommodate evenly fresh market and transformation.

AVERAGE
HEIGHT
2M

Dwarf cherries introduced by the University of Saskatchewan are small trees with maximum height of 2,5 m and yields that can reach from 10 to 15 Kg of fruit per tree. These plants are extremely hardy and can withstand temperature as low as -40°C. (Zone 2b). Fruits are of superior quality than those of traditional hardy cherry trees (Prunus cerasus) such as the Evans and Montmorency varieties. Fruits are also bigger and sweeter. Picking season starts in July, lifespan of the stand can be of 20-25 years. Plants are self-pollinating (Bees preferred). Plants must be protected from dominant winds. A pH of 6,5 and more is ideal in a light soil, but other conditions are tolerated. Pruning can be done in the spring after the 5th year of growth. Never prune more than 20% of the bush canopy volume. Deers, squirrels, birds and caterpillars are among their natural enemies.

HASKAPS

PROTECTED VARIETY

AURORA

Growth and vegetation

Vigorous bush of 1.3 à 1.7 M. Upright and spreaded. Good resistance to mildew.

Harvest and yield

Excellent yield. Will pollinate other varieties of University of Saskatchewan. Ease of picking.

Berries

Shape is like a stretched pear. Size average is 1,9 gr. Ideal for gardens and free picking.

PROTECTED VARIETY

BOREAL BEAST

Growth and vegetation

Vigorous bush with an upright growth, stems are sturdier than other known varieties with an increase mildew tolerance.

Harvest and yield

Late variety with very good productivity suited for mechanical harvesting.

Berries

Increase fruit size when compared to Tundra and the Indigo series. Off the scale flavour and aroma. Berries stay attached to the stems for a prolong period and ease the mechanical harvesting.

PROTECTED VARIETY

BOREAL BEAUTY

Growth and vegetation

Upright growth and very vigorous bush, sturdier stems than other known varieties. Excellent resistance to mildew.

Harvest and yield

The latest variety with excellent productivity, very good for mechanical harvesting.

Berries

Excellent berry size, larger to the Indigo series and Tundra. Firm and thick fruit with oval shape. Berries will remain attached to the stems and ease mechanical harvest.

VARIÉTÉ PROTÉGÉE

BOREAL BLIZZARD

Growth and vegetation

Very vigorous upright bush. Increase growth rate compared to the Indigo series.

Harvest and yield

Mid-season to late harvest, a week later than Tundra. Excellent yield.

Berries

Fruit weight from 3 to 4 gr. Good firmness and excellent flavor.

NEW HASKAP

RHUBARB • GOOSEBERRIES • CURRENTS

Why choose crowns?

- SHORTER GROWTH PERIOD BEFORE HARVEST.
- MINIMIZE STRESS AT PLANTING.
- IMPROVED VIGOR GETTING OUT OF DORMANCY.
- ROOTS AND CROWNS LOADED WITH CARBOHYDRATES.

MILLENIUM

Growth and vegetation

Very good hardiness and productivity. Will exhibit rust susceptibility under favorable conditions.

Harvest and yield

Excellent yield sustained year after year.

Spears

One of the best rated spears on the market. Spears will stay tight long after emerging. Even under hot conditions spears quality does not decline.

**Roots are sowed with a precision seeder
in a sterilized soil.**

PROTECTED
VARIETY

ECLIPSE

NEW ASPARAGUS

Growth and vegetation

Excellent hardiness and vigour selected for its foliar disease resistance and longevity of years of harvests.

Harvest and yield

Have showed equal or higher marketable yield than Guelph Millennium as well as an increase longevity of years of harvests.

Spears

Long, smooth spears with tight tips and uniform spear diameter. Like Millennium, spears stay tight long after emergence..

PROTECTED
VARIETY

EQUINOX

NEW ASPARAGUS

Growth and vegetation

Excellent vigor and excellent hardiness. Well adapted to a wide range of soil types. Will tolerate better replant situation than other varieties.

Harvest and yield

Potentially the highest yielder on the market. Early to midseason harvest.

Spears

Medium size, straight and uniform spears. They will remain tight long after emergence, even under warm conditions.

HARDY KIWI

ISSAI

A superfruit loaded with antioxidants

Growth and vegetation

Compact growth; foliage will need trellising. Hardy and vigorous, minimal pruning needed. Good tolerance to diseases and changing climatic conditions.

Harvest and yield

One plant can bear many kilograms of fruit, highly productive. Harvest will take place in late summer and early fall.

Berries

Fruit size equivalent to a large table grape, smooth-skinned and sweet berries that can be harvested easily. Self-fertile plant with perfumed flowers, yield will benefit from a second plant pollination.
